Seattle, WA | 206-255-4492 | haichenlei@gmail.com | [linkedin.com/in/millor-lei-4a0870232](https://www.linkedin.com/in/millor-lei-4a0870232) | millorlei.com

EDUCATION

University of Washington

Seattle, WA

B.S. in Informatics, GPA: 3.76/4.0

Sep 2022 – June 2026

Relevant Coursework: Distributed Systems, Server-Side Development, Database Modeling, Machine Learning, Data Structures & Algorithms

EXPERIENCE

Software Developer

Sep 2025 – May 2026

Homehudl (Real Estate SaaS)

Seattle, WA

- Refactored a large-scale Next.js / TypeScript codebase into a modular, service-oriented architecture with centralized API services, shared types, and schema validation, improving development velocity by 30% in a production system
- Developed a scalable full-stack feature using React and RESTful APIs to support dynamic multi-role user workflows, increasing onboarding completion by 40% in a high-traffic web application
- Designed and implemented a data transformation pipeline to normalize client-side data into backend JSON schemas, improving API reliability, data consistency, and fault tolerance across distributed services
- Built and optimized backend services for real-time agent matching using Node.js, API integration, and data synchronization, improving system performance and reducing user drop-off by 25%
- Improved frontend performance and system efficiency by optimizing rendering logic and implementing secure API communication with authentication-aware requests and strict input validation

Software Development Intern

Dec 2025 – June 2026

Gekko (AI-SIEM)

Bellevue, WA

- Deployed and maintained a containerized AI chatbot platform on Oracle Cloud Infrastructure (OCI) using Docker, supporting Retrieval-Augmented Generation (RAG) workflows and observability services
- Built and deployed production-grade RAG pipelines using vector databases (ChromaDB) and LLM orchestration, supporting scalable AI-driven analytics and real-time data processing.
- Instrumented LLM applications with OpenTelemetry and integrated telemetry data into Splunk, monitoring request latency, system health, and chatbot usage metrics
- Designed distributed logging, tracing, and monitoring pipelines for end-to-end visibility across services, improving system reliability, fault detection, and debugging efficiency
- Developed backend APIs and service workflows for knowledge retrieval, chatbot interactions, and human-agent escalation, improving reliability and operational visibility

PROJECTS

iPlanner — Full-Stack Course Planning Platform | Next.js, Node.js, MongoDB

Winter 2025

- Built a full-stack web application using Next.js, Node.js, and MongoDB, supporting real-time filtering and schedule generation
- Designed RESTful APIs and optimized Mongoose schemas for large-scale datasets, improving query performance and system scalability

Let SQL Fly — Relational Data Analytics Platform | PostgreSQL, SQL

Spring 2025

- Designed normalized relational schemas across 6+ entities and ensured data integrity
- Wrote advanced SQL queries (CTEs, window functions, joins) to analyze 1M+ records and built ETL pipelines for large-scale data processing

AWS Cloud Deployment of Web Application | AWS S3, CloudFront, IAM, GitHub Actions

Autumn 2024

- Deployed a production web application on AWS (S3, CloudFront) with IAM least-privilege policies; automated build and deployment via GitHub Actions CI/CD pipelines.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, SQL

Backend: Node.js, Express.js, REST APIs, API Design, API Integration, Schema Validation, Microservices, Event-Driven Architecture

Frontend: React, Next.js, Tailwind CSS, Redux, HTML5, CSS3, Responsive Design, Performance Optimization

Cloud & DevOps: AWS, OCI, Azure, Docker, Microservices, Distributed Systems, CI/CD, Deployment, OpenTelemetry, Monitoring, Logging, Splunk

Databases: MongoDB, PostgreSQL, ChromaDB, NoSQL, Relational Databases, Query Optimization

Tools: Git, GitHub, VS Code, Figma, Postman
